This is in response to the request for correction of patent application publication under 37 CFR 1.221(b), which was received on March 14, 2003.

The request is DISMISSED.

The instant request is that the application be republished because the assignee information is missing from the front page of the publication.

37 CFR 1.221(b) is applicable "only when the Office makes a material mistake which is apparent from Office records." A material mistake must affect the public's ability to appreciate the technical disclosure of the patent application publication, to determine the scope of the patent application publication, or to determine the scope of the provisional rights that an applicant may seek to enforce upon issuance of a patent.¹ The instant request does not identify a material mistake in the publication made by the Office:

The instant request does not identify a material mistake in the publication made by the Office. The assignment information was not printed on the patent application publication, because it was not provided on the transmittal letter or on an application data sheet.² The Office prints the assignee information as reflected on the transmittal letter or application data sheet, if provided by applicant and does not look at the assignment records for the assignment information.

The applicant is advised that a "request for republication of an application previously published" may be filed under 37 CFR 1.221(a). Such a request for republication "must include a copy of the application in compliance with the Office's electronic filing system requirements and be accompanied by the publication fee set forth in § 1.18(d) and the processing fee set forth in § 1.17(i)." If the request for republication does not comply with the electronic filing system requirements, the republication will not take place and the publication fee set forth in § 1.18(d)
